

Table: Person

Column Name	Type
person_id	int
name	varchar
profession	ENUM

person_id is the primary key for this table.

Each row in this table contains a person's ID, name, and profession.

The profession column is an enum of the type ('Doctor', 'Singer', 'Actor', 'Player', 'Engineer', 'Lawyer').

Write an SQL query to report each person's name followed by the first letter of their profession enclosed in parentheses.

Return the result table **ordered** by person_id in **descending order**.

The query result format is shown in the following example.

Example 1:**

Input:

Person table:

person_id	name	profession
1	Alex	Singer
3	Alice	Actor
2	Bob	Player
4	Messi	Doctor
6	Tyson	Engineer
5	Meir	Lawyer

Output:

person_id	name	
6	Tyson(E)	
5	Meir(L)	
4	Messi(D)	
3	Alice(A)	
2	Bob(P)	
1	Alex(S)	

Explanation: Note that there should not be any white space between the name and the first le
